

MUHAMMAD AMSYAR OMAR

Software Engineer

amsyaromarr@gmail.com | +60176358103 | Selangor, Malaysia | github.com/amsyar99 | linkedin.com/in/amsyaromar

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 4+ years of hands-on experience designing, developing, and deploying enterprise-grade software solutions. Proficient in Java, Spring Boot, microservices architecture, and full-stack development with Angular. Demonstrated ability to translate complex business requirements into scalable, maintainable systems from supply chain platform implementation to high-availability fintech microservices. Adept at cross-functional collaboration, technical leadership, and delivering production-ready software in fast-paced, agile environments.

TECHNICAL SKILLS

Languages: Java, TypeScript, HTML, CSS, SQL, Groovy, XML

Frameworks: Spring Boot, Angular, Hibernate/JPA, REST API, JSP

Database: MySQL, Oracle DB

Cloud: Amazon Web Services (AWS), Alibaba Cloud

CI/CD & DevOps: Docker, Jenkins, GitLab, Bamboo

Build Tools: Maven, Gradle

Testing: JUnit, Mockito

Tools: IntelliJ, Putty, GitHub, Jira

Practices: Microservices, System Architecture, Code Review, Unit Testing

Language: Proficient in English, Bahasa Melayu

WORK EXPERIENCE

E2OPEN, LLC

Mar 2025 – Present

Implementation Engineer

- Led end-to-end implementation of enterprise supply chain systems using Java, Groovy, and XML for solution.
- Utilized tools like IntelliJ, Putty, Bamboo, and GitHub for development, troubleshooting, CI/CD, and version control.
- Lead system testing, code reviews, and unit testing cycles to ensure high-quality, production-ready deliverables with minimal post-release defects.
- Provide 3rd-level production support diagnosing, triaging, and resolving critical issues to maintain system stability and meet SLA commitments.
- Engage with clients on the future recommendations and technical requirement support, addressing their evolving needs.

SERVEDECK INNOVATION SDN BHD

Jul 2023 – Feb 2025

Software Developer (Full Stack)

- Developed and maintained full-stack enterprise applications using Java, Spring Boot, Angular, REST API, and Hibernate/JPA, ensuring performance, scalability, and code maintainability.
- Led end-to-end client projects from requirement gathering and system design through development, testing, and deployment consistently delivering on schedule.
- Spearheaded technical and operational initiatives, establishing best practices for code quality, debugging workflows, and exception handling across the development team.
- Diagnosed and resolved production issues promptly, reducing system downtime and improving overall application reliability.

TNG DIGITAL SDN BHD

Mar 2022 – Jun 2023

Java Developer

- Built and maintained microservices-based backend systems using Java, Spring Boot, REST APIs, and Hibernate SQL, supporting high-availability financial transaction processing.
- Analyzed high-level software strategies and translated business requirements into well-designed, testable program modules aligned with functional specifications.
- Integrated third-party application components and internal services to deliver end-to-end business workflows, streamlining deployment pipelines and CI/CD processes.
- Proactively troubleshooted and resolved production incidents, ensuring minimal disruption and fast mean-time-to-resolution (MTTR).

EDUCATION

Universiti Teknologi MARA (UiTM)

Mar 2020 – Aug 2022

Bachelor in Computer Science | CGPA: 3.63
